Summary

Machine Learning and Data Science students focused on building end-to-end ML systems and data-driven applications. Experienced in predictive modeling, data analysis, and working with real-world datasets using Python, Scikit-Learn, and distributed data tools like Apache Spark.

Education

Bachelor of Engineering in Computer Science (Data Science), **SCE**

Sept 2023 – May 2027

Experience

Machine Learning Trainee – Acmegrade, Bangalore

Dec 2025 – Jan 2026

Tech Stack: Python, NumPy, Pandas, Matplotlib, SQL, Scikit-Learn

Applied machine learning techniques to build and evaluate predictive models using real-world datasets

Project: Rainfall Prediction Classifier

- Built an end-to-end ML model using Australian weather dataset (~7.5K records)
- Developed preprocessing pipeline using ColumnTransformer for mixed features
- Trained and optimized Random Forest using GridSearchCV with cross-validation
- Achieved **85.78% test accuracy** and evaluated using classification metrics

Projects

1. Real-Time AI Sign Language Translator

Technologies: Python, TensorFlow, MediaPipe, OpenCV, Streamlit, Docker

• Developed a real-time bidirectional translation system (Sign-to-Text/Speech & Text-to-Sign) using custom-trained deep learning models on 160+ sign classes.

2. SWaT AI Guardian

Technologies: Python, Kafka, Apache Spark (PySpark), FastAPI, Plotly

• Built a real-time streaming analytics platform for anomaly detection using Kafka and Spark to process continuous data streams.

3. SpaceX Falcon 9 Landing Prediction

Technologies: Python, Scikit-Learn, SQL, BeautifulSoup, REST APIs

• Developed a machine learning model to predict Falcon 9 landing success using real-world data with API integration and web scraping.

Skills

Languages & Core: Python, SQL

Machine Learning & Deep Learning: Scikit-Learn, TensorFlow

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Plotly

Computer Vision: OpenCV, MediaPipe

Big Data & Streaming: Apache Spark (PySpark, Spark SQL), Kafka

Backend & Tools: FastAPI, REST APIs, BeautifulSoup, JSON, Docker, Streamlit, Git

Certifications

1. IBM Data Science Professional Certificate
2. Machine Learning Trainee
